

Student Start Guide

Welcome to CourseWave! This is your go-to guide for setting up your CourseWave account and accessing your assessments.

Accessing CourseWave

Once your teacher has imported the access codes into CourseWave, you will receive an email that will give you the ability to login to CourseWave.

A login button will display at the bottom of the email. Simply hit the button and it will take you to the login page or www.coursewave.com. There, you will have the option to set up your account through **Gmail** or **Microsoft**.

Your Dashboard

Once you have logged in you will be taken to your dashboard where you will find all of the Testing Resources that have been purchased for you. To access a book, simply click on the cover and it will take you to the available assessments.

Assessments

All of the books have chapter tests, a pretest, and a posttest. You will have immediate access to all of the tests. This means that you must pay attention to what tests you click on. If you accidentally take a test that your teacher didn't assign to you, you won't be able to take that assessment again unless your instructor manually clears it out for you.

The most important thing to do before taking any assessment is make sure that you are following your teacher's instructions very clearly.

Submitting An Assessment

Once you have submitted an assessment, you cannot revisit the test again. If you have a problem with your submission, please contact your instructor. Additionally, while tests are automatically graded, only your instructor will be able to see your grades.

If you have any questions or concerns, please contact your instructor!
